**Alicante, 20 of julio, 2022.** – The ELLIS Alicante Foundation has joined the XIP (Xarxa Inclusió i Participació - Network of inclusion and participation) project, whose objective is to guide and support non-profit entities in the Valencian Community in regulatory compliance and transparency. ELLIS Alicante, which carries out research in Artificial Intelligence for social good, aspires with this project to test and improve an ethical model of conduct applied both to its scientific work and to the good governance of the foundation.

Four foundations and three associations from the Valencian Community participate in this collaborative initiative. They will undergo an assessment process of their current state of compliance with regards to regulatory transparency obligations and will be provided with personalized guidance for improvement. The criteria applied will comply with the indicators dictated by new regional law\* as well as national legislation and will also incorporate the recommendations of the AEF.

At the end of this project ELLIS Alicante will make public its Code of Ethics and Good Governance on the transparency portal of its website (<https://ellisalicante.org/transparency>).
